

[bespoke services] made to measure

[Go bespoke]...

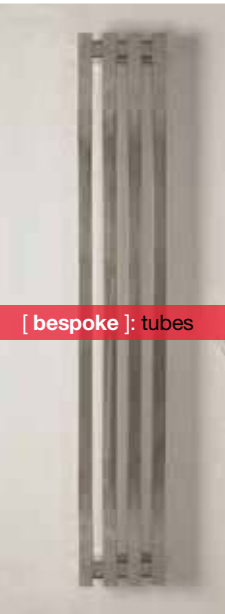

... Remember, you are not restricted by what you see in this brochure. Because we control the design and manufacture of our stainless steel products here in the UK, you can adapt any model to suit your own requirements. Or go for a completely bespoke design.

From precise tapping centres to match existing pipe-work, or hand crafted finishes for that real wow factor. The design of your radiator should not be left to the designers. Create your own unique style with the bespoke options offered by Radiator Centre Ltd.

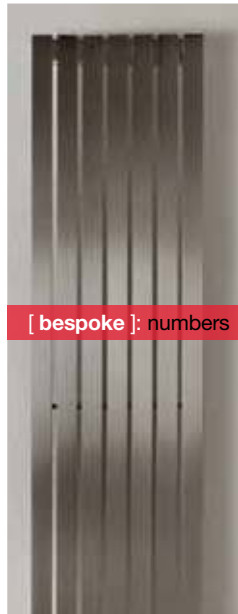

Most designs can be manufactured and delivered within 3 weeks.
